Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate(s); ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and further ways to reduce the information burden for small business concerns with fewer than 25 employees.

government.

Estimated Time Per Response: 1 hour.

Frequency of Response: On occasion recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 11, 151, 154, 161, 201-205, 215, and 218-220.

Total Annual Burden: 852 hours.

Nature and Extent of Confidentiality: The Commission is not requesting that the respondents submit confidential information to the Commission. If the Commission requests applicants to submit information that the respondents believe is confidential, respondents may request confidential treatment of such information under 47 CFR 0.459 of the Commission's rules.

Needs and Uses: The Commission, in 2004, adopted the Joint Conference's recommendations to reinstate the following Part 32 accounts: Account 5230, Directory revenue;

Account 6621, Call completion services; Account 6622, Number services; Account 6623, customer services; Account 6561, Depreciation expense-telecommunications plant in service;

Account 6562, Depreciation expense-property held for future telecommunications use; Account 6563, Amortization expense-tangible; Account 6564, Amortization expense-intangible; and

Account 6565, Amortization expense-other. The Commission established a recordkeeping

requirement that Class A ILECs maintain subsidiary record categories for unbundled network

element revenues, resale revenues, reciprocal compensation revenues, and other interconnection

revenues in the accounts in which these revenues are currently recorded. The use of subsidiary

record categories allows carriers to use whatever mechanisms they choose, including those

currently in place, to identify the relevant amounts as long as the information can be made

available to state and federal regulators upon request. The use of subsidiary record categories for

interconnection revenue does not require massive changes to the ILECs' accounting systems and

is a far less burdensome alternative than the creation of new accounts and/or subaccounts. The

information submitted to the Commission by carriers provides the necessary detail to enable the

Commission to fulfill its regulatory responsibilities.

Federal Communications Commission.
